

PRISMASPERSE - A

AQUEOUS PIGMENT DISPERSIONS

AQUEOUS PIGMENT DISPERSIONS

The Prismasperse-A range are our high-performance styrenated acrylic pigment dispersions

Prismasperse-A are a premium series of water-based pigment dispersions engineered on a robust styrenated acrylic resin system. Designed to deliver exceptional strength, flow and versatility.

These dispersions excel across demanding, highly filled and alkaline environments - making them ideal for construction materials. Whilst also providing the high gloss and transparency required for aqueous printing inks, particularly flexographic applications.

Whether enhancing the colour impact of cementitious systems or achieving sharp, vivid tones in print, **Prismasperse-A offers consistency, efficiency and performance.**

KEY FEATURES AND BENEFITS

- **Pre-dispersed pigments** - Ready to use in water-based systems, reducing processing time and variability
- **High colour strength** - Strong intense shades for lasting impact and durability
- **High gloss & transparency** - Ideal for premium ink finishes with sharp detail
- **Excellent compatibility** - Performs in a wide range of construction, coating and ink systems
- **Freeflowing** - Easy handling and seamless incorporation into a variety of formulations

The Prismasperse-A range combines **technical robustness** with **formulation flexibility**, delivering reliable performance from building site to print shop.

As well aqueous pigment
dispersions The Prisma
Group has a wide portfolio
for the plastics, rubber and
surface coating industries:

Silicone Colourants

Solvent Dispersions

Liquid Dispersions

Polyol Dispersions

Thermoplastic Additives

Thermoplastic Colour
Masterbatch

Rubber Colour Masterbatch

Rubber Additives

Rotational Moulding Powders

Thermoplastic Compounds
